

# Here's the part where you can calculate compliant state taxes & fees across all jurisdictions

51 different US jurisdictions means 51 different methods to accurately calculate total loss settlement taxes and fees. Total Loss Workbook helps total loss claims professionals stay up to date with changes to each jurisdiction's fee schedules. The solution also helps maintain compliance and consistency of total loss settlement calculations to meet insurance policy and Department of Insurance requirements.

## Key features

- **Calculation accuracy** - Fees and taxes monitored daily for changes/updates
- **Compliance and consistency** - Maintain company-wide uniformity and accuracy to benefit both centralized and decentralized teams
- **Configurable** - Adhere to DOI regulations, insurance policy requirements, and company practices/preferences in each state/jurisdiction
- **Easy to use** - Intelligent interface that guides users through the automated calculation workflow
- **Automated data import** - Avoid inaccuracies and rekeying efforts by uploading the ACV report to import relevant administrative data
- **Supported vehicle types** - Passenger, Light Truck, Motorcycle, RVs, Trailers, Intrastate commercial light and medium duty vehicles, intrastate heavy commercial trucks
- **Settlement calculation, DOI and DMV information** - Reference details are memorialized for future reference and reporting
