Streamline the process for reviewing & approving repairs for damaged vehicles

DeskRev supports efficient estimate reviews, audits, or subrogations from any estimating platform, helping users catch operation overwrites, find policy guideline exceptions, and display rates & parts availability.

DeskRev benefits

- Provides an efficient setup that makes it simple to do business with all trading partners and helps fill gaps within the workflow
- Designed from the ground-up to support collision repair estimate importing from multiple formats, including PDFs and exported estimate files
- Performs and automatically merges part searches by utilizing the leading part search engines
- Ensures compliance with estimating standards, labor rates, negotiated fees, discounts, DOI guidelines, and insurance company guidelines
- Fully supports CIECA-developed standards and incorporates compliant import/export routines and web services
