## Seller Workflow

### The Simplicity

#1: PBD sets up your account using personalized idle rules to market and match your parts to a buyer.

#2: Via inventory collection, parts are matched with potential buyers.

#3: PBD reviews all parts, requested quantities, and offers with the potential buyer and secures approval.

#4: Offers are emailed to the seller for review.

#5: If the seller chooses to sell any requested quantity on the offer, the match is confirmed and both parties are notified through email regarding dealer information.

PBD can coordinate shipping logistics by obtaining quotes from third-party vendors and finding the best price for you.
