

# Enjoy streamlined repair & OEM parts ordering with the RepairLink & Shopmonkey Integration

Welcome to a new era of streamlined operations and enhanced productivity for your repair shop thanks to the powerful integration of RepairLink with Shopmonkey's all-in-one shop management software.

This partnership is designed to maximize your shop's efficiency, allowing users to search for and order parts directly from within the shop management software's repair order screen. This integration enables Shopmonkey users to track their parts orders, manage them, and create quick estimates. They can also search and filter parts options based on the vehicle's RO details using keywords, parts numbers and categories.

## Integration Benefits

- **Simplified Parts Ordering:** With RepairLink's comprehensive parts catalog now integrated with Shopmonkey, ordering parts has never been easier. Access a vast network of OEM parts directly from your Shopmonkey dashboard, ensuring you get the right parts quickly and efficiently. No more toggling between systems—order parts with just a few clicks.
- **Streamlined Workflow:** Combine the power of Shopmonkey's intuitive shop management tools with RepairLink's robust parts ordering capabilities. Enjoy a seamless flow from estimating to invoicing, with real-time updates and notifications keeping you informed every step of the way. This integration helps reduce manual data entry, minimize errors, and accelerate your service processes.
- **Increased Efficiency and Productivity:** Eliminate the friction of managing separate systems. The integration allows your team to work more efficiently by centralizing key functions in one place. This boosts productivity and lets you devote more time to serving your customers and growing your business.
- **Better Communication and Collaboration:** With RepairLink and Shopmonkey working together, your team will experience enhanced communication and collaboration. Share parts information, estimates, and repair orders effortlessly, ensuring everyone stays on the same page and projects move forward smoothly.
